STRONGBOW WINDOWS

Better Homes

Enjoy a greener future with Strongbow

HUDDERSFIELD'S long established Strongbow Windows is going green - by installing one of the most energy efficient window systems currently available.

Strongbow installers are now fitting the Liniar market leading window system on all properties. Tony Booth, who heads the family-run Strongbow Windows in Red Doles Lane, off Leeds Road, said: "From now all our windows, doors and conservatories are installed with the new Liniar profile system. This means that our installations are as 'green' as possible and leading the way in energy awareness."

The Liniar window system consistently achieves high energy ratings because it needs virtually no steel reinforcement, has multiple chambers to lock in the heat and high performing seals to ensure there are gaps for heat escapes.

Because the new Liniar system has been designed from scratch, it is able to meet the challenges of today. Many of the existing window profile systems are over 20 years old and were not designed with today's energy conscious consumer in mind.

The Liniar window system is also lead free and one of the few UK systems to offer an entirely lead free range of products.

Strongbow Windows offers the highly efficient B rated energy window as standard but the A rated version is also available for an additional cost. From a security point of view, the new Liniar window system has been engineered to meet the most stringent security systems and has gained the Secured by Design status from the Association of Police Officers.

All products have been tested by the British Standards Institute including enhanced security performance.

Liniar profiles can be made to create any style

■ **PATIO:** Open up and let the outside in

of window and can be designed, manufactured and installed specifically for your home, in your chosen finish including traditional white, rosewood, golden oak and a selection of colours.

Strongbow Windows also makes bi-folding doors which are also created with the Liniar profile. Such doors are very popular with local homeowners today as they add style to a room and give access to the garden.

Bi-folding doors are a popular addition to an orangery or conservatory. Also popular today are coloured composite

■ **GREEN:** Examples of the new 'green' window and door system from Strongbow Windows

doors in a range of styles which add kerb appeal to any home. Strongbow customers can rest assured that the team will oversee the whole installation project from start to finish including any necessary building work for conservatories, planning permission (if required), electrical work, plastering etc.

Tony, his wife Ann, family and staff are also committed to giving great attention to detail and full customer satisfaction. To find out more about Strongbow Windows products, take a look at the website www.strongbowwindows.co.uk or ring 01484 512743. Look forward to a greener future with the new Strongbow Windows products.
